DATA EXTRACTION SYSTEM/DES (SURVEYS-ON-CALL) - Pre 1996 Files

Quick Instructions

The Data Extraction System is a tool for extracting records (rows) and fields (columns) from very large, public-information, data files (for example: survey and census records.) The system produces custom extracts in selectable data file formats (not meant for humans to read) which, when processed, can then be picked up at the Census Bureau's FTP site. This system DOES NOT produce simple counts or tabulations. It produces ONLY RAW DATA which must then be picked up and processed by programming or statistical analysis software elsewhere. Absolutely NO CONFIDENTIAL DATA are available via this service!

Please feel free to make sample requests but please DO NOT PLAY with this system. It is very easy to request very large amounts of data without realizing it. This can tie up large amounts of storage and processing resources, and prevent other users from doing their work. Please READ THE DETAILED INSTRUCTIONS and create a limited extract (10 to 1,000 records) to test before asking for a complete extract (MAX records).

HTML-Forms capability and a large amount of browser memory cache are required for HTML based access to the DES. If your browser has difficulty upon reaching 'LEVEL: 4' it is not a problem with the DES. The problem is your browser and/or computer are not handling the large amount of information which must be carried by the Level: 4 HTML. Some LEVEL: 4 HTMLs require over 8 megabytes of MEMORY CACHE (Not Disk Cache!) in order to display all the variables and to function properly. Please do not report incomplete variable lists or missing 'submit buttons' as a problem with DES. It is a limitation of the browser/hardware combination you are using and there is nothing that can be done to fix the problem from this end. If you have this problem your only options are to adjust your browser or try a newer or different browser. Please report the problem to your browser supplier so they can fix their software's HTML page/form size limitations.

If you have questions about the data content or content documentation, please contact the data expert for that particular data source (See DES Level 1 - list of Available Data Sources). Every data file/source listed by the DES has a 'Help by E-Mail' link for sending e-mail to the appropriate DES data content expert. If you have other questions you can send email to
'webmaster@census.gov' or use our 'Contacts List' for telephone assistance (regular business hours Eastern Time Zone).

If you find problems with the software or documentation please let the system designer know. Every effort will be made to correct problems as quickly as possible. Unfortunately sufficient human resources are not available to provide one on one assistance on how to transfer and process extracted data. This much knowledge must be assumed for ALL users of the Data Extraction System.

1996 SIPP Data Now available via Ferret System ONLY
FERRETT (Federal Electronic Research and Review Extraction Tool) - 1996 Files and forward

What can I do with FERRET?

The FERRET system can:

- Extract a dataset
- Get variable documentation
- Produce & Display cross-tabulations
- Display pre-specified macrodata tables

What can I NOT do with FERRET?

The FERRET system cannot:

- Give you statistical means or medians
- Create new recodes of existing variables

Extractions & Custom Tables

From this option you will be able to:

- Create crosstabs
- Create frequencies
- Create a SAS dataset for downloading
- Create an ASCII output file where you can:
  - download the file or
  - bring your data results into a spreadsheet, etc.

Pre-specified macrodata tables

From this option you will be able to:

- Browse pre-specified macrodata tables
- You can search for tables by entering keywords
- These tables are also organized by groups
- You can look at the titles of all the tables within a group
- Each individual table may have its own table of contents depending on its size
  - The table sizes range from 1 part with 2 pages to 240 parts with 2880 pages
  - Most tables are separated into 8-12 pages per part

Choose the option for the type of data you want:
(Please Note: If you are unfamiliar with the chosen survey's concepts and variables, you should try looking at the already created tables first.)
- I want to look at tables already created; i.e. macrodata
- I want to create my own tables or extract my own data files; i.e. microdata
